ABOUT US

RING SPORT was founded in 1993 and in the following decades became one of the largest and one of the first importers of fitness equipment for home exercise, martial arts equipment, as well as equipment for equipping professional gyms in Southern Europe.

RING sports equipment is certainly the equipment with the best price-quality-design ratio in the region.

We have been present on the market for 30 years, in over 500 stores, over 100 online shops in more than 14 countries.

Graduated technologists and athletes collaborate on the design of fitness devices and equipment at the same time.

The result is that RING fitness devices, props and equipment are massively used by both recreational people and top athletes. RING SPORT is dedicated to building quality and innovative products that provide its consumers with a healthy and comfortable lifestyle. We are dedicated to achieving the highest quality standards, through attention to detail and design in production, at the same time enabling the price to be the most competitive on the market. All our machines have the necessary certificates, which are a guarantee of quality. That is why the percentage of complaints about our products is even below 2%.

RING PROFESSIONAL as a brand has existed for over 15 years when we started with the first lines of devices for professional use. The brand is available in Serbia for the first time since 2023, following the great market demand for quality professional equipment. Until now, we have actively equipped numerous fitness centers and hotels in Balkan, Eastern Europe, Spain, Portugal, Germany...

Currently, 4 innovative lines of professional equipment are available (2 lines of loaded machines and 2 lines of plate loaded machines) as well as numerous benches, racks, cardio equipment and accessories for machines and props.

In addition to the top quality, our machines are recognizable by their unique modern design that can fit into any commercial space.

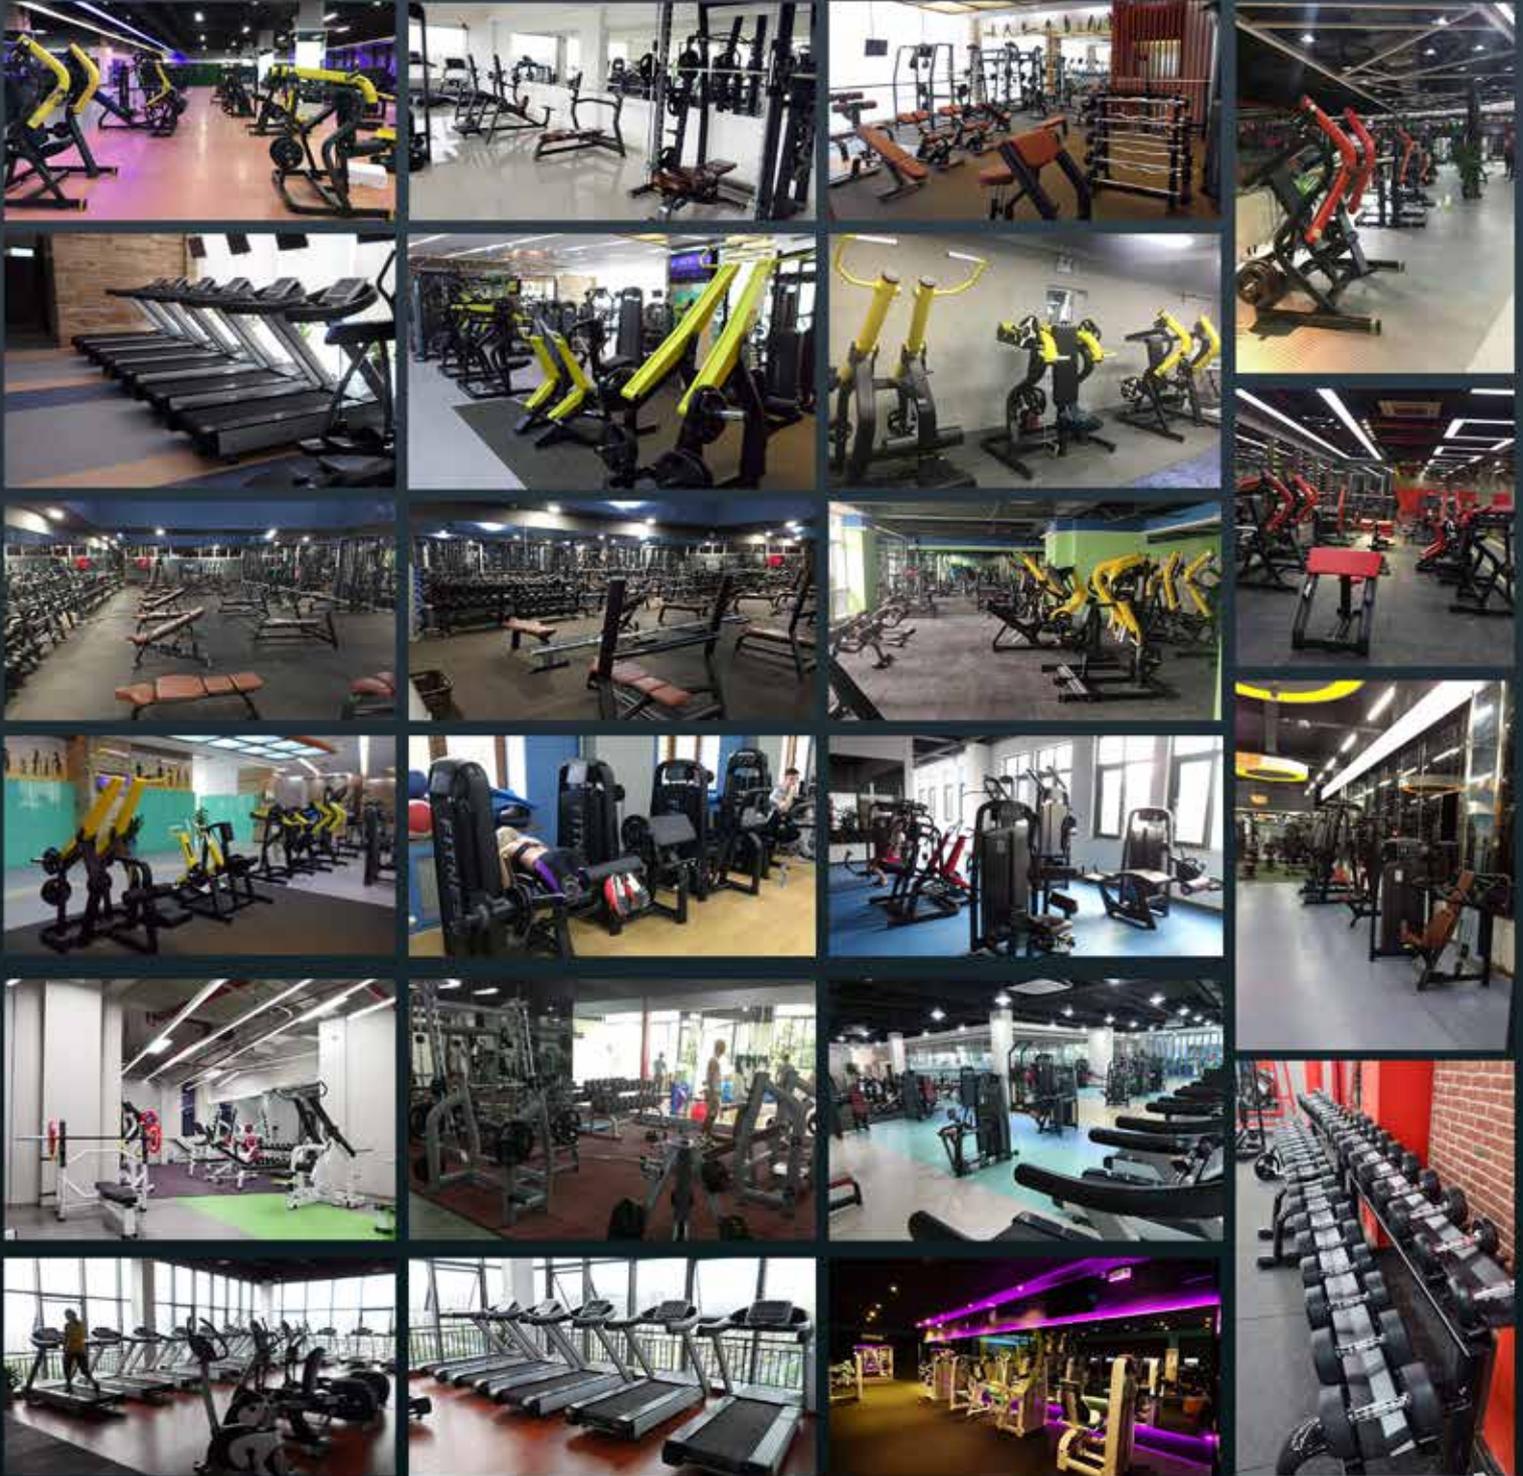

All machines have certificates and a guarantee.

WEIGHTED MACHINES

INFINITY LINE

- The simplified and timeless design of this line represents pure luxury.
- Pure steel plates with rubber shock absorbers improve the durability of the device, increase accuracy and reduce noise during exercise.
- Each device has settings so that it is comfortable and adapted to body movements.
- Ergonomic cushions made of synthetic leather (PU) provide comfortable support for sitting and body support.
- Handles made of alloy steel (d=40mm) polished at high temperatures and hard chrome plating processes have excellent resistance to corrosion and wear.
- Each machine has a sticker with instructions for proper use and a marked muscle group target and a water bottle holder.

CARDIO MACHINES

TREADMILLS

- We can certainly say that RING professional treadmills are of better quality than many well-known world brands.
- First of all, we have a very stable and accurate computer.
- Bearings and tread made in Germany from the highest quality materials provide a natural feeling when running.
- The heart of our tape system is the Mitsubishi transducer (the main electronic assembly that controls the entire tape), which has proven to be very safe and reliable.
- In addition to minimal complaints, we will also give an example that one of our first models, which owned the then model Mitsubishi transducer, found itself in a famous flood in 2014, when the treadmill was in water and mud for 3 days.
- After only one wash, the tapes worked and are still exhibits in our showroom today.
